Eyes	Use eye contact	B up	Break – wake up
Bubble	Bubble that thought	B down	Break – calm down
Pencil	Get to the point		
Heart	Share your feelings		

Social Symbol Strips are symbols that can be put on the child's desk to help the child figure out what social cues s/he needs to modify. For example, if a child with a social disability is monopolizing a conversation, the teacher can point to the = sign. This is a great and dignified way to help students recognize the social skills issue without drawing large attention to their issues.
